

College of Innovation & Technology

Build software that serves people, not just users.

OC's Computer Science program pairs a rigorous CS core with a human-centered design track — so you graduate knowing how to write good code and design things people actually want to use.

Fall 2026 sections open

12 courses

Human-Computer Interaction

CMSC 4113

Database Systems

CMSC 4323

Patterns of OO Systems

CMSC 5633

Why students choose CS at OC

A small department means direct access to faculty, real studio-style critique, and project work that starts on day one instead of senior year.

1:14

Small class sizes

Most upper-level courses run under 20 students, so faculty know your work — and where you're stuck.

HCI

Design-minded curriculum

Every CS student takes Human-Computer Interaction, learning to design for real people before shipping code.

D2

NCAA DII campus life

Study alongside Eagles athletics and a tight-knit residential campus in Edmond, Oklahoma.

A sample of what you'll take

Courses rotate each term — here's a snapshot of what's on the books for current CS and Graduate CS students.

CMSC 4113 / 5313

Human-Computer Interaction

Design systems, usability heuristics, and prototyping — with weekly critique of real interfaces.

Tuesdays, 6:00–9:30 PM PEC 229

CMSC 4323

Database Systems

Relational modeling, query optimization, and transaction design for production-scale data.

Tue & Thu, 1:10–2:25 PM NSW 204

CMSC 5633

Patterns of Object-Oriented Systems

Design patterns and architectural decisions that keep large codebases maintainable.

Mondays, 6:00–9:30 PM PEC 228

ENGL 3493

Technical Writing

Writing the documentation, specs, and proposals engineers actually have to produce on the job.

Mon/Wed/Fri, 10:00–10:50 AM LC 247

JM

"We don't just teach students to write code that works — we teach them to design software that people can actually use. That distinction changes how they think about every project after this one."

Instructor, Human-Computer Interaction · Department of Computer Science

Come see the department in person

Sit in on a class, meet current students, and tour the CS labs on the Edmond campus.
